## **Hexaware expands European presence: Opens Global Delivery Centre in Bucharest**

*Global Delivery Centre in Europe; Reinforces commitment to the European region. Caters to client needs for service delivery within the EU*

**Mumbai, India and Bucharest, Romania – October 5, 2016:** Hexaware Technologies Limited, a leading global provider of Application, Infrastructure, BPO and Digital services expanded its delivery presence in the European region by announcing the opening of its latest Global Delivery Centre (GDC) in Bucharest, Romania. This is in addition to the London and Tver (Russia) GDCs that Hexaware already uses to service its European and Global clients. Currently, the Company services more than a dozen customers from its Onshore and Nearshore delivery centres.

The Bucharest Global Delivery centre is situated in a prime location and in close proximity to several key clients within the European region. The state of the art infrastructure enables the Company to undertake critical IT and Business process projects, which need delivery within the European region and adds to Hexaware's capability in delivering its services in several European languages from within the same regulatory region and time zone.

The Company will be recruiting from the region's significant population of talented technology professionals and graduates for its new centre, which will have an initial capacity for 150 consultants. Hexaware will also offer opportunities for experienced Hexaware technology subject matter experts across technology domains to relocate to Bucharest.

Hexaware will commence recruitment from local universities and engineering schools starting next year. The hiring of experienced professionals will continue on an on-going basis from the local markets.

"Bucharest is recognized as one of the fastest growing hubs for the high tech industry, providing us with access to a great talent pool to add to our global human capital." said **R Srikrishna, Chief Executive Officer, Hexaware Technologies Limited**. "With the new centre in place, we continue to invest in our ability to service our customers in the Next Gen service areas like Agile Application development, Hybrid Cloud Services, Modern End User services, Digital Managed services in the BPO space. This centre will allow us to service critical customer requirements relative to EU Data Privacy regulations."

"We will invest in implementing Learning & Development programs under the aegis of Hexaversity, focus on institutionalizing the Quality processes here and ensure seamless delivery across our network of GDCs," said **Amrinder Singh, Senior Vice President – European Business Unit**. "These steps would invariably strengthen our ability to add value to our Europe based customers by addressing their business needs better."

The Bucharest centre joins the company's centres in North America and Mexico to service its global customers. In addition, Hexaware has Global Delivery Centres located in Mumbai, Chennai, Pune, Nagpur and Bengaluru in India. These initiatives enable the Company to serve its clients better, recruit best in class local talent and drive above-industry revenue growth consistently while maintaining desired profitability metrics.
