

Case Study

Travel and Transportation

To validate scalability of next generation cloud hosted Flight Information Display System

Client Overview

One of the leading Airport that handles the largest point to point flights and which is used by 35 million passenger per year

Business Need

- Deployment of next generation cloud hosted flight information display systems which should be scalable to support screens in real time from production environment
- To provide on-premise test bed to support screens load test.

Business Challenge

- Solution for scripting and simulating the video contents from the load testing tool
- Production screens set up and working with Next Gen FIDS system vendor for metrics collection.

About Hexaware

Hexaware is the fastest growing next-generation provider of IT, BPO and consulting services. Our focus lies on taking a leadership position in helping our clients attain customer intimacy as their competitive advantage. Our digital offerings have helped our clients achieve operational excellence and customer delight by 'Powering Man Machine Collaboration.' We are now on a journey of metamorphosing the experiences of our customer's customers by leveraging our industry-leading delivery and execution model, built around the strategy— 'Automate Everything, Cloudify Everything, Transform Customer Experiences.'

Hexaware Approach

- Recommended load simulation from 3000 browsers post NFR gathering and architecture validation.
- HPE LR Truclient Protocol for scripting and HP Storm Runner for test execution from cloud
- Steered Virtual War room with all stakeholders for test executions in production environment.
- Advised critical metrics for performance monitoring of Next Gen FIDS
- Validated Cloud Auto-scaling features.

Business Benefits

- Business confidence to roll out Next Gen FIDS solution at airport with high performance.
- Pro-active benchmarking of capacity
- Early warning signs of maximum supportable screen .
- Recommendations to Next Gen FIDS to increase scalability .
