Independent Research Firm recognizes Hexaware as a Strong Performer in Continuous Testing Providers' Evaluation

Mumbai, 16 August 2017: Hexaware Technologies Ltd, the fastest growing automation-led, next-generation provider of IT, BPO and consulting services, today announced that it has been listed as a 'strong performer' in continuous testing by Forrester Research, in their report titled - "The Forrester Wave™: Continuous Testing Service Providers, Q3 2017."

The Forrester report has identified the 11 most significant providers based on a 29-criteria evaluation of continuous testing (CT) service providers. Top CT providers were evaluated based on their current offering in terms of the scope of CT consulting services, test case design automation, automation engineering, and advanced testing-in-production capabilities, strategy in the context of modern Agile and DevOps application delivery and vendors' market presence. Hexaware tied for the highest score, 4.6 on a 5 point scale in the Continuous Testing Talent criterion. It was also among the highest scores of 4 in the Continuous Testing Service vision criterion.

According to the report, Hexaware demonstrated a strong overall offering. The research states that Hexaware is forming a growing base of CT talent by leveraging its multiskilled development and testing workforce. The report further states that Hexaware would be a good fit for clients that are trying to optimize test design and data management automation and are looking for multiskilled developer-tester (DTEST) resources. Hexaware has developed partnerships, to build connectors to link test design automation to test execution using Selenium. The company has also demonstrated capabilities in providing CT services over many years with enterprise clients.

"This recognition comes at an opportune time for Hexaware with its positive response from clients, for its innovative platforms like iD2E (Integrated Design to Execution) automation, FAME (Framework for automated mobile testing), Usability Measurement Index model, automated Big data testing, service virtualizations." said **Tony Mohanty, Global Head, Digital Assurance, Hexaware Technologies**. He further added, "We consider this to be a strong testimony to Hexaware as a digital transformation partner to support clients with its continuous testing (CT) services, in their Agile and DevOps initiatives."

Hexaware's two-pronged strategy for growth focusses on identifying opportunities for growth while delivering 'Quality with Speed' and assuring quality for digital transformation programs by its leveraging Continuous Test Platform (CTP). The CTP platform integrated multi-channel innovative accelerators, pre-build domain-centric test suites, service virtualization driven test environment and plug and play solutions.
