

Leading German information & communications technology service providers

Business Context

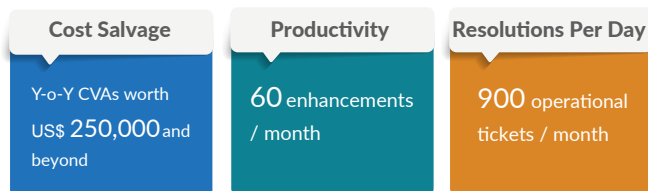

Client: Leading German ICT Service providers
Size: 800 million EURO

Situation: Material Management / Transportation - Technical Implementation in SAP. System primarily deals with the supply & disposal of railway track construction materials to a construction site. The construction site team (requester) provides the information like the materials & transports required for constructing the railway track with a request folder to the construction logistics team. Based on this request, the construction logistics team will use ISM-PrIMA to identify the optimal material and transport suppliers.

Need for Agile Devops

- Complex business process which is running on MS Access, excel which gives the user high flexibility to bend the process
- Technology - BOPF and FBI
- Distributed locations
- Increase Return on Investment
- Reduced cost of service - offshore-centric delivery model

Outcomes Achieved

Hexaware approach

- Seasoned approach for working across **2 time zones:**
 - **Core team & Requirements team in Germany**
 - **Time-boxed iterations (3 weeks) (tacts, aka sprints)**
 - **Pair Programming**
- Ready framework for **Continuous Delivery**
 - **JIRA** for Agile project management and test management
- High **collaboration** through agile practices:
 - **Collaboration:** Face to face communication, Skype calls
 - **Meetings:** Twice weekly meetings for UX, Visual design walkthrough. Sprint Planning, Daily standup, Sprint Reviews & Retrospective meetings. Daily backlog grooming session with product user and end users
 - Test driven development and Key performance indicators to track Scrum assimilation and velocity improvement
