

An International Education Foundation Transforms through Master Data Store

Client Overview

The client is one of the leading international education foundations in the UK .

The Need

The client wanted an overall system transformation as part of its vision for 2020, which included the following:

- Unified solution for all the stakeholders
- Centralized storage for organization data, currently stored on disparate systems, to reduce data redundancy, inconsistency, as well as quality and enrichment issues
- Lack of data ownership due to data stored on disparate systems
- Lack of enterprise-level data sharing in the in-house applications, resulting in information sharing and user accessibility issues

The Solution

Hexaware recommended and implemented a master data store with the following setup to resolve data quality issues:

- A centralized source of clean data which will be used by all other dependant systems
- A single level of integration between MDS and its source systems in place of multiple system-to-system integrations
- Facility to maintain the history of data changes performed
- Update the vault with enriched data, to enable Single sign-on (SSO)

Value Delivered

- Provided a single point of access for trusted data across the organization
- Implemented authentication based authorization across systems, by using Single sign-on (SSO)
- Assisted client in achieving increased operational efficiency as well as better employee development

NA Headquarters

Metro 101, Suite 600, 101 Wood Avenue South, Iselin, New Jersey - 08830
Tel: +001-609-409-6950
