

A leading construction machinery and equipment manufacturing company streamlined their business applications from diverse legacy systems to one single and unified Solution in SAP

Client Overview

One of the largest manufacturer of heavy attachment brands which is part of the South Korean conglomerate. Major business applications are maintained in diverse systems and due to business growth the customer was finding difficulty in integrating the diverse

Hexaware's role

One of the largest manufacturer of heavy attachment brands which is part of the South Korean conglomerate. Major business applications are maintained in diverse systems and due to business growth the customer was finding difficulty in integrating the diverse.

Solution

Understanding the customer business and pain points, Hexaware has brought in robust SAP implementation processes; tools, templates and best practices in implemented the following modules:

- Variant configurator
- Production Planning (PP)
- Material Management (MM)
- Sales and Distribution (SD)
- Costing (CO)
- COPA
- SAP BPC

Data migration is considered as the core activity as data sources directly relate to the customers' business critical application. Hexaware's template based migration methodology helps in flawless transfer of legacy data's from multiple disparate systems without impacting customers operations and loss of data's.

Hexaware also built interface for RF Scanner, Corporate data warehouse and SAP BPC in integrating the production shop floor, warehouse systems with ERP layers.

Challenges faced

- Complex business scenarios in Make to Order process due to more Customer variants
- Migration of Legacy Master Data was challenging and complex due to multiple disparate systems
- Five level Product Hierarchy required additional mapping and customization

Value Proposition

- This implementation is considered as one of the fast track implementation which is achieved due to Hexaware's robust implementation methodology resulting in high customer satisfactory index
- The new system has enabled the client to unify and integrate all their operational processes in to one single and unified Solution on SAP, thus improving visibility of their operational processes and overall operational efficiency
- Best commercial optimization and flexibility resulted in better ROI for the customers
