Case Study  
Banking And Financial Services

# Unlocking the Value of Cloud Migration with Automated Replatforming for a Leading Financial Firm

## The Client

One of the largest banks in the US with operations in the US, Europe, Australia, Asia Pacific, etc.

## The Business Challenge

The client was looking to adopt and scale to cloud for greater flexibility, better agility, and business transformation. One of their primary concerns was a complex Java web application that was developed 12 years ago on WebLogic (App Server and WebLogic MQ). This legacy application built using Session EJB, Entity Bean, Struts, JSP, etc. was business-critical and controlled core financial business processes. Adding to the uncertainty was the unavailability of key SMEs who had developed this application. All of these posed critical challenges to the cloud migration journey.

## The Hexaware Solution

Hexaware proposed amaze®, a proprietary and automated application replatforming solution for mass cloud migration, primarily designed for Java and .Net applications. As the first step, a comprehensive assessment was performed to understand associated risks, cost, timelines, and inter-dependencies. The automation-driven holistic approach involved the following well-defined roadmap:

- The application was broken into web front end and service back end
- The back end EJBs (Session Beans) were replatformed to independent Spring Boot Service Apps with REST endpoints
- The web front and each service app was then deployed on Tomcat in separate containers on Kubernetes, the cluster on private cloud providing infinite scalability, high availability, high fault tolerance, and improved performance
- The service REST API endpoints were secured with OAuth 2.0
- Automated testing was done for all macro services
- Containerization scripts and CI/CD pipeline were generated for each macro service and web front

## The Business Benefits

## About Hexaware

Hexaware is the fastest growing next-generation provider of IT, BPO and consulting services. Our focus lies on taking a leadership position in helping our clients attain customer intimacy as their competitive advantage. Our digital offerings have helped our clients achieve operational excellence and customer delight by 'Powering Man Machine Collaboration.' We are now on a journey of metamorphosing the experiences of our customer's customers by leveraging our industry-leading delivery and execution model, built around the strategy— Automate Everything®, Cloudify Everything®, Transform Customer Experiences®.

We serve customers in Banking, Financial Services, Capital Markets, Healthcare, Insurance, Manufacturing, Retail, Education, Telecom, Hi-Tech & Professional Services (Tax, Audit, Accounting and Legal), Travel, Transportation and Logistics. We deliver highly evolved services in Rapid Application prototyping, development and deployment; Build, Migrate and Run Cloud solutions; Automation-based Application support; Enterprise Solutions for digitizing the back-office; Customer Experience Transformation; Business Intelligence & Analytics; Digital Assurance (Testing); Infrastructure Management Services; and Business Process Services.

Hexaware services customers in over two dozen languages, from every major time zone and every major regulatory zone. Our goal is to be the first IT services company in the world to have a 50% digital workforce.
