Case Study

Banking And Financial Services

Migrating .NET Applications to Azure Cloud for a Leading US-based Advisory Firm

About the Client

- A leading US-based accounting and advisory organization with a global presence and operations across 50+ countries
- 10+ billion-dollar worth with 40000 employees

Business Challenges

The client had a global presence, and thus, its scope of business was also huge and spread across multiple countries. It had a complex lease advisory on-premise product on legacy .NET with single tenant on-premise database and was looking for cloud migration strategies for this application's migration to Azure cloud. This product was developed years ago, and new-age employees found it difficult to understand and manage it on-premise. In short, it was seemingly becoming a black box for them. As the client was striving hard to accelerate its efforts on the global GTM initiative, this product became a bottleneck due to unavoidable limitations on its scalability, performance, agility, and efficiency. Cloud migration had become the need of the hour for improved scalability and TCO reduction by leveraging high-performing cloud environment. This would also server better business agility and add value to the client's expansion plans.

Hexaware's Solution and Approach

We leveraged our proprietary Application Cloud Replatforming product suite amaze® for Applications. Our solution comprised of the following key steps:

- The legacy .NET product was decoupled into web frontend and service backend. The backend services were migrated to .NET Core microservices with REST endpoints.
- The independent micro applications were containerized and deployed on Azure App Services with API endpoints over multi-tenant database and Azure B2B. CI/CD was added for higher release velocity.
- The web front was migrated to Angular and integrated with Azure Directory Services.
- The database was migrated from SQL server to Azure SQL server.

Business Benefits

TCO reduction by over 50% due to the elimination of licensing costs

Rapid cloud migration using amaze®

Business Benefits

Over 50% reduction in implementation cost due to automation

Manual user interface redesign using the latest SPA

About Hexaware

Hexaware is the fastest growing next-generation provider of IT, BPO and consulting services. Our focus lies on taking a leadership position in helping our clients attain customer intimacy as their competitive advantage. Our digital offerings have helped our clients achieve operational excellence and customer delight by 'Powering Man Machine Collaboration.' We are now on a journey of metamorphosing the experiences of our customer's customers by leveraging our industry-leading delivery and execution model, built around the strategy— Automate Everything®, Cloudify Everything®, Transform Customer Experiences®.

We serve customers in Banking, Financial Services, Capital Markets, Healthcare, Insurance, Manufacturing, Retail, Education, Telecom, Hi-Tech & Professional Services (Tax, Audit, Accounting and Legal), Travel, Transportation and Logistics. We deliver highly evolved services in Rapid Application prototyping, development and deployment; Build, Migrate and Run Cloud solutions; Automation-based Application support; Enterprise Solutions for digitizing the back-office; Customer Experience Transformation; Business Intelligence & Analytics; Digital Assurance (Testing); Infrastructure Management Services; and Business Process Services.

Hexaware services customers in over two dozen languages, from every major time zone and every major regulatory zone. Our goal is to be the first IT services company in the world to have a 50% digital workforce.
