

Hexaware

“Hexaware offers comprehensive AWS consulting services aligned with Amaze®, Mobiquity™ and Tensai™.”

Ashwin Gaidhani

Overview

Hexaware is headquartered in Mumbai, India, and operates in more than 30 countries. It has more than 24,200 employees across 37 global offices. In FY21, the company generated \$971 million (+14.9 percent YoY) in revenue, with financial services as its largest segment. Hexaware is investing in building engineering and center-of-excellence capabilities on AWS, with a short-term focus on developing competencies and platforms, such as Amaze®, to accelerate the cloud journey.

Strengths

Three pillars of a comprehensive set of AWS consulting and services:

Hexaware has continued its augmented AWS consulting services offerings, with its long-term focus on its three pillars, Amaze®, Mobiquity™ and Tensai™. These three pillars make AWS consulting and client journey-mapping a holistic and multidimensional approach across the cloud re-platforming, customer service enhancement and automation functions.

Cultural diversity feeding into holistic and extensive innovations:

The impact of this holistic AWS consulting approach is further augmented by Hexaware’s focus on a diverse cultural mechanism, with more than 25,000 Hexaware innovators across 88 nationalities.

Futureproofing clients’ cloud journeys with ESG capabilities:

The cloud initiatives and services from Hexaware offer the maturity and future readiness that clients in the U.S. market need today, for example, the ESG-related capabilities that are made available through a sustainability partner, Goodera.

Caution

Hexaware has industry-leading, holistic cloud capabilities that can be spread across technology services and end-user organizations as best practices for cloud adoption. However, this will require regular, frequent, strategic communications, best practice guidance and research artifacts, to come out of the Hexaware and AWS practice units.
