

"Hexaware's Tensai®, Amaze® and RapidX™ platforms help clients digitize and platformize client businesses from legacy to cloud to code."

Dr Tapati Bandopadhyay

Hexaware

Overview

Hexaware is headquartered in Mumbai, India. It has more than 30,000 employees across 54 offices in 28 countries. In FY23, the company generated \$1.3 billion in revenue, with Financial Services as its largest segment. Hexaware builds enterprise-grade platforms with composable architecture and AI-driven automation. Its Amaze® platform simplifies cloud migration, while RapidX™ enhances software development with GenAI-driven SDLC automation. Tensai® improves IT operations through intelligent automation. Its strategic acquisitions and partnerships with OpenAI and hyperscalers expand its AI innovation. Hexaware's US-based consulting services drive AI-led modernization for enterprises.

Strengths

North Star to platforms: Hexaware's platforms deliver exceptional value to its clients, starting with the North Star approach that puts a heavy focus on the overall goal, leading to digital platformization and new business outcomes.

Accelerating software development:

Hexaware's RapidX™ platform is designed to expedite the deployment of digital solutions by providing tools for agile and efficient software delivery. The company collaborates with its large hyperscaler partners to enhance RapidX™, aiming to support clients in cloud-native product development. Its cloud partnerships help clients build durable, value-sustainable, scalable and efficient software platforms, accelerating their digitalization initiatives.

Cloud-to-code migration and optimization:

Amaze® is Hexaware's platform dedicated to facilitating seamless cloud migration and optimization. Tensai® is Hexaware's AI-powered platform that enhances code release management to create dynamic, scalable and high-accuracy knowledge ecosystems. These platforms are designed to reduce the TCO, improve support efficiency and speed up product development. Amaze® delivers prescriptive results, reducing the TCO and enabling clients to achieve efficient and effective digital transformations.

Caution

Hexaware's Tensai® harnesses GenAI to swiftly create reliable knowledge artifacts and enhances scalable integration, compliance and observability. These benefits can be bundled in tangible dollar value terms, for example, customer storyboards by verticals, to depict the art of the possible and its value in the U.S. market.
