Google Cloud Professional Services (Consulting and Migration)

Hexaware

"Hexaware, leveraging its robust cloud migration strategies, delivers innovative, secure and efficient cloud transitions for clients in the Google Cloud professional services domain."

Tapati Bandopadhyay

Overview

Hexaware is headquartered in Mumbai, India. It has more than 32,000 employees across 28 countries. In FY24, the company generated $1.4 billion in revenue, with Financial Services as its largest segment. Hexaware provides Google Cloud professional services using its Amaze® platform for automation-led application, data modernization and migration acceleration. Its approach ensures low-risk, scalable digital transitions. In the U.S., Hexaware focuses on enabling enterprises across the finance, healthcare and manufacturing sectors to achieve scalable digital modernization with efficient Google Cloud adoption and intelligent workload transformation.

Strengths

Comprehensive approach: Hexaware provides end-to-end support, from strategic consulting to implementation and ongoing maintenance, across key Google Cloud Specialization areas such as cloud infrastructure, data analytics, ML, application development and security. Hexaware's partnership with Google Cloud empowers it to deliver impactful results by optimizing infrastructure, leveraging data analytics and enhancing productivity through solutions like G Suite.

Three-pronged strategy: Hexaware strategically addresses evolving industry norms by focusing on three core strategies: *Cloudify Everything, Automate Everything and Enhance CX*. Recognizing the importance of cloud adoption, Hexaware prioritizes a customer-first approach to help organizations navigate the unique challenges encountered during cloud migration, ongoing operations management and application development.

Proprietary solutions for cloud modernization: Hexaware's Amaze® platform provides comprehensive automation for assessing cloud readiness across infrastructure, applications and data. It modernizes by offering multiple transformation pathways — replatforming, refactoring and rearchitecting — coupled with enhanced visibility into target state design decisions, reducing the TCO.

Caution

Hexaware can enhance its ability to solve intricate optimization challenges for clients across various industries by partnering with Google Cloud on research to develop innovative, industry-focused ML algorithms.
